CERTIFICATES

Machine Learning use in Flutter

Leveraged machine learning models in Flutter applications to enable advanced features such as image recognition, barcode scanning, text translation, face detection, and object detection, enhancing automation and user experience.

SUMMARY

Experienced Flutter Developer with 2 years of experience building high-performance cross-platform mobile apps using Dart. Delivered 2+ production apps, boosting user engagement by up to 80% through optimized architecture, state management, UI/UX implementation, and scalable API-driven solutions.

WORK EXPERIENCE

Associate Software Developer

Jun 2024 - Present

BinYuga Pvt. Ltd, Remote

- Built and deployed cross-platform Flutter applications using **MVVM architecture** with **GitHub Copilot**, published on **cPanel** and **Google Play Store**.
- Improved performance and scalability using **GetX/Provider** state management, REST API integration, and Google APIs for geolocation and address services.
- Implemented real-time video communication with the **Agora SDK** and **secure payments via Stripe and Razorpay**.

Member of Technical Staff

Feb 2024 - May 2024

Synnefa Tech Pvt. Ltd, Nashik

- Implemented secure **Stripe payment integration**, developed backend services using Node.js and Express.js, and enabled geolocation and navigation features through **Google Maps API integration** to support Flutter applications.

Flutter Developer

Jan 2023 - Feb 2024

BinYuga Pvt. Ltd

- Improved** application reliability and performance through thorough testing, troubleshooting, and delivery of scalable solutions.

EDUCATION

Master of Computer Application (MCA):

Jul 2021 - Aug 2023

Dr. Babasaheb Ambedkar Marathwada University
Aurangabad

CGPA: 8

PROJECTS

ProHealth Management

Jun 2024 - Present

ProHealth Management is a comprehensive web application designed for hospitals and healthcare organizations to streamline company, office, and service operations. It enables efficient document compliance management, HR and employee onboarding workflows, patient and clinician profile management with role-based access control, and secure communication through chat, voice/video calls, and an Outlook-style internal mail system.

Maintenance Application

Aug 2025 - Nov 2025

MAINT is a multi-platform maintenance service application (Android & Web) that connects users with professional service providers for on-demand repairs. It supports real-time service booking, live location tracking, in-app communication, and a robust admin panel for managing vendors, subscriptions, and service operations, and is successfully deployed on the Google Play Store with production-grade stability.
